INTRODUCTION

The Reader Development Program of the Free Library of Philadelphia makes available materials written on or below the 8th grade reading level. These materials are designed to aid under-educated adults and young adults in overcoming the educational, cultural and economic deficiencies in their lives.

The materials are available to those who live or work in Philadelphia. They are loaned in quantity to instructors, tutors, reading specialists, social workers and others working with the under-educated as well as to the individual himself.

This supplement to the bibliography is a record of materials purchased between January 1972 and January 1973. Together with the 1971 Annotated Bibliography and the 1972 Supplement, it is a record of the instructional materials in the Reader Development Program. A complete revision of this list will appear early in 1974.

The collection is divided into six major reader interest categories of which five are represented here. This list is arranged alphabetically by title within each category.

A demonstration collection containing one copy of all materials considered for the program is available at the Center for examination.
